

蛋白质化学

hydrophobic interaction

oligoprotein

subunit

isoelectirc point

configuration

conformation

protein primary structure

protein secondary structure

α -helix

B-sheet

Domain

Super-secondary structure

Protein tertiary structure

Protein quarternary structure

Allosteric effect

Protein denaturaton

Protein renaturation

Salting out

simple protein

conjugated protein

Peptide

peptide bond

peptide unit

Oligopeptide

Polypeptide

Chaperone

disulfide bond

协同效应

酶

Holoenzyme

K_m

Prosthetic group

Coenzyme

Monomeric enzyme

Oligomeric enzyme

Multienzyme complex

Allosteric enzyme

Isoenzyme

Enzyme

multifunctional enzyme

active site/active center

essential group

结合部位

催化部位

absolute specificity

relative specificity

Stereospecificity

中间产物学说

诱导契合学说

激活剂

固定化酶

activation energy

Michaelis-Menten equation

Michaelis constant

catalytic number) (Kcat

competitive inhibition

noncompetitive inhibition

uncompetitive inhibition

U , active unit

specific activity

Zymogen

regulatory enzyme

allosteric modulator

生物化学名词解释

蛋白质化学和酶

acid-base catalysis

covalent catalysis

别构调节

共价修饰
