

《大学英语》

水平考试模拟卷

2025.6

Part I Listening 35%

Section One Long Conversation 15% (1.5' × 10 = 15')

Directions: In this section, you will hear **TWO** long conversations. At the end of each conversation, you will hear some questions. The conversations and the questions will be spoken **ONLY ONCE**. After you hear a question, you must choose the best answer from the four choices and **mark the corresponding letter on the ANSWER SHEET** with a single line through the centre.

Conversation 1

1. A) 9
C) 15
B) 12
D) 18
2. A) Dark grey
C) Bright yellow
B) Dark red
D) Light green
3. A) Take it home after lunch.
B) Hand it to a staff member.
C) Put it in the can provided.
D) Put it in a large plastic bag.
4. A) Dolphins
B) Fur seals
C) Sea eagles
D) Whales
5. A) Do not drink before boarding.
B) Take medication before boarding.
C) Do not eat before boarding.
D) Focus on the horizon.

Conversation 2

6. A) His family owned a train business.
B) He was curious about the system.
C) His brother was a subway operator.
D) He used to play train games as a child.
7. A) A mechanic
B) A bus driver
C) A ticket conductor
D) A train station manager
8. A) Watching TV shows about trains
B) Spending time studying manuals
C) Playing train simulation games
D) Taking courses in engineering
9. A) When he started learning management
B) When he finished university courses
C) After he got promoted to supervisor
D) After he drove trains alone at night
10. A) His first day driving a subway train
B) Winning an award for the safest train drive
C) Helping people stay calm during an outage
D) Attending a subway operators' conference

Section Two News Report 10% (1' × 10 = 10')

Directions: In this section, you will hear **THREE** news reports. At the end of each report, you will hear some questions. The news reports and the questions will be spoken **ONLY ONCE**. After you hear a question, you must choose the best answer from the four choices and **mark the corresponding letter on the ANSWER SHEET** with a single line through the centre.

News report 1

11. A) 20 B) 23 C) 36 D) 59
12. A) Heavy rainfall during construction
B) Lack of approval for construction
C) Workers living on site with their families
D) The use of poor-quality building materials
13. A) The building was approved for seven floors.

- B) The owners of the building have been released.
- C) The workers were found working with little protective gear.
- D) No officials in Kep province would be fired because of the collapse.

News report 2

- 14. A) To improve efficiency at checkouts
 - B) To track customer shopping habits
 - C) To prevent theft and ensure safety
 - D) To improve customer experience
- 15. A) The police will be alerted.
 - B) The store will be alerted.
 - C) The person will be arrested.
 - D) The person will be questioned.
- 16. A) It is not accurate enough to be widely used.
 - B) It may not work well in all store conditions.
 - C) It is too costly for the benefits it provides.
 - D) It threatens privacy and needs regulation.

News report 3

- 17. A) Remove personal statements completely
 - B) Add more free-response essay questions
 - C) Increase the essay length to 6,000 characters
 - D) Replace the essay with three specific questions
- 18. A) The character limit for responses
 - B) The types of questions asked
 - C) The format of the personal statement
 - D) The way references are submitted
- 19. A) To make essays more creative
 - B) To make applications shorter and faster
 - C) To encourage more students to apply
 - D) To create a fairer application process
- 20. A) It is too vague and will not help students.
 - B) It is very similar to a personal statement.
 - C) It will help students showcase their strengths.
 - D) It will make the process more complicated.

Section Three Passage (10%) (2' ×5=10')

Directions: In this section, you will hear **ONE** passage. At the end of this passage, you will hear some questions. The passage and the questions will be spoken **ONLY ONCE**. After you hear a question, you must choose the best answer from the four choices and **mark the corresponding letter on the ANSWER SHEET** with a single line through the centre.

21. A) Teens in cities with public transportation
B) Teens in rural areas without public transit
C) Teens from wealthy families with carriages
D) Teens who walked or used bicycles
22. A) It has made teens more independent.
B) It has reduced the need for teens to drive.
C) It has increased teens' social interactions.
D) It has made driving lessons more accessible.
23. A) Economic downturns lead to fewer driving schools.
B) Teens focus more on saving money for their future.
C) Families have less time for driving lessons due to work.
D) Inflation is making cars and driving lessons less affordable.
24. A) They are more likely to have accidents.
B) They often delay getting driver's licenses.
C) They need special test accommodations.
D) Driving is encouraged for mood improvement.
25. A) Fewer social events and networking
B) Greater reliance on public transport
C) More savings on car-related expenses
D) Fewer chances to practice independence

Part II Reading Comprehension 45%

Section One Banked Cloze 15% (1'×10=10')

Directions: In this section, there is a passage with ten blanks. You are required to select one word for each blank from a list of choices given in a word bank. Read the passage carefully before making your choices. You **must not** use any of the words in the bank **more than once**. Write **the corresponding letter** before the word you choose on **the ANSWER SHEET**.

- | | |
|------------------|---------------|
| A) focus | I) ideas |
| B) essentially | J) busy |
| C) improve | K) pleasure |
| D) replace | L) importance |
| E) exciting | M) unusual |
| F) lower | N) repeatedly |
| G) imitate | O) adapt |
| H) disappointing | |

I was lucky as a parent in many ways, but I always felt especially grateful that my kids were readers. They were so into reading, in fact, that we had to (26) _____ a few of our Harry Potter books because they'd been so heavily used and abused (one child loved to read them while eating). Our kids' appetite for books was great! On a practical level, books were a cheap way to keep them entertained and (27) _____, which gave parents some much-needed peace and quiet. More importantly, reading also ignited their creativity, enriched their vocabulary, enhanced their academic skills, and deepened their global awareness. That's why, when they hit middle school, it was so (28) _____ to see my kids reading less and less. By the time they got to high school, though they did plenty of reading for homework, they had (29) _____ stopped reading for fun.

It turns out that my kids' experience was not all that (30) _____. According to a survey by Scholastic, the enjoyment that young people get from reading — and the amount of time they spend doing it — drops significantly around middle school.

There may be a couple of reasons for this. First, it may be that schools have decided to (31) _____ their expectations for students. As both students and parents increasingly resist rigorous academic challenges, some teachers have to (32) _____ by giving students less work and more grades to avoid confrontations. Second, school curricula have shifted their (33) _____ to skills like critical reading. In order to meet standards and make sure their students pass

state tests, teachers even in lower grades are more likely to analyze small passages rather than reading whole books.

The problem with blaming the schools is that school isn't — and maybe shouldn't be — the place where kids learn to love reading. Shouldn't that start at home? Kids aren't the only ones who are reading less. Fewer than half of American adults read even one book for (34) _____ each year. Less than 40% read any fiction or literature. We all know that kids (35) _____ the behavior they see from the adults in their lives. If kids see their parents messing around on their phones or watching TV instead of reading, they probably won't choose to read, either.

Section Two Multiple Choice Questions 20% (2' × 10 = 20')

Directions: There are **TWO** short passages in this section. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and **mark the corresponding letter on the ANSWER SHEET** with a single line through the centre.

Passage One

To learn more about how people share online, a group of psychologists asked 352 teenagers in Iran how often they posted their feelings, opinions, and values on social media. Teens who shared a lot online had higher levels of anxiety and attention-seeking behaviors. These teens also reported feeling more worry and a strong attachment to social media, with many having an intense urge to post.

Oversharing comes in many forms, like sadsfishing, or negative online sharing with the goal of seeking sympathy. It can be hard to tell whether a teen is just oversharing on social media in order to “fish” for sympathetic responses, or whether they're experiencing depression and possibly even suicidal thoughts. While some teens who post in this way are actually suffering from mental health conditions, the sadsfishing phenomenon may be keeping those individuals from getting the help they need, because their expressions of sadness aren't recognized as genuine.

Sharing too much—or too little—can harm a relationship. “You want your level of closeness to be about the same,” said Emmelyn Croes, an assistant professor at Tilburg University who studies how people get to know each other through communication technology. “You don't want to share very personal details if the other person does not do the same.” On the other hand, sharing works best when both people share similar kinds of information, and this back-and-forth inspires trust and brings us closer.

Yet disclosing information about ourselves is part of how we communicate who we are. Sociologist Erving Goffman said in his important book, *The Presentation of the Self in Everyday Life*, that showing ourselves to others is a way of managing impressions; sharing helps us control what and how others think about us.

So, sharing online is not a bad thing. Whether in person or online, people want to learn about each other. It's not just being curious—this information helps people understand what to expect from each other and what their relationship will be like. Goffman called these sources of information “sign vehicles.” They include the place where you meet someone, how they look, and how they act. Today, social media accounts are also part of these sign vehicles.

36. What does the study of teenagers sharing feelings on social media mainly suggest?
- A) Sharing online reduces anxiety and promotes calmness among teens.
 - B) Teens sharing less often feel more worried and dependent on social media.
 - C) Posting frequently is linked to increased anxiety and desire for attention.
 - D) Posting opinions helps teenagers avoid feeling anxious or insecure.
37. What challenge does sadfishing create?
- A) It leads to ignoring all emotional posts regardless of content.
 - B) It causes people to assume sadness is an attention-seeking act.
 - C) It makes it harder for teens to express positive emotions online.
 - D) It makes it difficult to tell if sadness is genuine or for sympathy.
38. Why is it important for people in a relationship to share similar levels of personal information?
- A) To help both people feel comfortable and build trust
 - B) To make sure both people understand each other better
 - C) To keep the relationship fair and avoid misunderstandings
 - D) To support open communication and strengthen the bond
39. How does sharing personal information help people manage their social image?
- A) It forces them to hide important personality traits.
 - B) It causes others to misunderstand their true character.
 - C) It makes others ignore their behavior and appearance.
 - D) It allows them to influence others' opinions about themselves.
40. How do social media accounts function as “sign vehicles” in modern communication?
- A) They limit the information people can share about themselves.

- B) They mainly serve as entertainment without personal meaning.
- C) They replace face-to-face meetings as the only way to connect.
- D) They provide cues that shape how people expect others to behave.

Passage Two

Research from HR management system Employment Hero has revealed an almost 10 per cent rise in the number of baby boomers in the UK returning to casual hospitality jobs to supplement their income and maintain an active lifestyle. This sector ranks second in employment growth for this demographic, trailing only finance and insurance. An earlier report by Caterer.com found that over-50s now make up more than a third of the hospitality workforce, with 165,000 joining in the last three years. This trend partly reverses the early pandemic years when many over-50s left the UK workforce, opting for early retirement.

Now, hospitality, once a long-hour, hard-labor, high-turnover culture, has evolved to be a more flexible working environment and as a result, is drawing more older workers back. Employers say they are attracted by the wide range of roles the industry offers as well as the social element. They have found hiring more in this age group boosts staff retention rates compared with, for example, more transient younger people and students.

Wilson Smith, a former prison director now working as a *concierge* (酒店礼宾人员) at Swinton Park Hotel's castle estate, explains that he returned to work primarily to stay mentally and physically engaged rather than for financial reasons. He typically works two eight-hour shifts weekly, a flexible setup benefiting both him and his employer. His availability also allows him to cover last-minute schedule changes that might challenge employees with other commitments.

Some of the UK's largest hospitality companies are actively recruiting older workers. Fuller's, a pub and hotel chain, has partnered with Rest Less, a digital community and job site for over-50s, and adapted its recruitment strategy to appeal to this group. According to Dawn Browne, the company's people and talent director, individuals over 50 now represent 12 per cent of Fuller's workforce.

Browne notes, "I thought there might be hesitation about hiring someone in their 60s for certain roles, but managers have fully embraced it. Managing a predominantly young team can be challenging, as managers sometimes have to take on a parental role. Having older team members with more life experience helps support younger colleagues."

Over-50s have been attracted to the sector partly because responsibilities have

evolved to suit them better. “It’s no longer just being on your feet all day waitressing; there’s more complexity and scope in hotel work, particularly as the operational model changes,” says Anna, citing how back-office roles are increasingly outnumbering front-of-house positions.

Employers have adapted their pay structures as well. Ben Mayou, chair of the Lake District Hotels Association and manager of the Lakeside Hotel, says, “Previously, people were paid a fixed salary and expected to work extra hours without extra pay, which isn’t fair. We’re moving toward hourly pay to change that perception.”

At Mayou’s hotel, a quarter of the 120 staff are over 50, including retirees and semi-retirees who have returned to roles such as reception, portering, and housekeeping. Many are former professionals seeking less responsibility but attracted to the social environment. Mayou reports a 75 per cent retention rate, significantly higher than the sector average of 33 per cent.

This stability is proving to be a key benefit in an industry that has long struggled with retention. Added to this is an increasingly long holiday season that can no longer rely on students over the summer, he adds.

41. What has been a key factor in attracting baby boomers back to hospitality work?
- A) Competitive salaries compared to other industries
 - B) Greater flexibility in the working environment
 - C) Reduced physical demands in customer service
 - D) Shorter commuting times to workplace locations
42. Why did Wilson Smith return to work after retirement?
- A) To advance in the hospitality hierarchy
 - B) To supplement his retirement income
 - C) To pursue a long-held career interest
 - D) To maintain mental and physical engagement
43. What can be inferred about young recruits in the hospitality industry?
- A) They often possess greater technical expertise.
 - B) They may require additional guidance from managers.
 - C) They typically demonstrate higher loyalty to employers.
 - D) They generally prefer fixed salary compensation structures.

44. What can be inferred about the changing pay structure in the hospitality industry?
- A) It represents a response to union negotiations.
 - B) It aims to attract workers from competitor industries.
 - C) It addresses previous unfair compensation practices.
 - D) It follows regulations from employment authorities.
45. How have hospitality employers benefited from hiring older workers?
- A) Enhanced marketing appeal to senior customers
 - B) Improved technical skills throughout the workforce
 - C) Reduced training costs for entry-level positions
 - D) Higher retention rates compared to younger employees

Section Three Matching 10% (1.5' × 10 = 15')

Directions: *In this section, you are going to read ONE passage with ten statements attached to it. Each statement contains information given in one of the paragraphs. Identify the paragraph from which the information is derived. You may choose a paragraph **more than once**. Each paragraph is marked with a letter. Answer the questions by **marking the corresponding letter on the ANSWER SHEET** with a single line through the centre.*

- A The classic American mall is undergoing a dramatic transformation as real estate developers swap out dying department stores for apartments, ushering in an era where living at the mall could soon become a new norm. Some U.S. developers are knocking down department stores like Macy's or JCPenney and using the spaces and their parking lots to put up apartment buildings next to the mall or connected to it via walkways and green spaces. In other cases, they've built apartments inside of shuttered storefronts and other shopping center properties or torn them down altogether to make way for a mix of housing, retail, restaurants, outdoor spaces and experiences.
- B "The mall is becoming cool again," said Jacob Knudsen, the vice president of development for Macerich, which is currently redeveloping the FlatIron Crossing Mall in Broomfield, Colorado to add housing. "So being able to live by it, work by it, play by it, go to restaurants by it, we're definitely seeing this as a trend."
- C This new version of the American mall comes as shopping centers across the country fight for survival and look to transformation to avoid extinction. It's clear that consumers still enjoy shopping in person after the Covid pandemic, but the traditional department store has been in decline since 2001 and is no

longer the draw it once was.

- D As companies like Macy's, JCPenney and Sears shrink or cease to exist altogether, real estate developers have been forced to get creative to repurpose those spaces, which typically take up at least half of a mall's footprint. Amazon distribution centers, *pickleball* (匹克球) courts and even an NHL training facility have all replaced big-box stores at American malls. But as the country copes with a housing crisis, the fastest growing use of these spaces is apartment complexes, real estate developers said. As of January 2022, at least 192 U.S. malls planned to add housing to their footprint, and at least 33 had constructed apartments since the pandemic began, according to Realogic, a real estate consulting firm. At least a dozen more apartment projects are underway at malls across the country, including in California, Florida, Arizona and Texas.
- E "There's just too much retail in the U.S.," said Oscar Parra, the principal of Pacific Retail Capital Partners' Special Situations Group. "It's like four times higher than any other nation. I don't know of a market that needs a million square foot mall."
- F For mall owners, the numbers make sense. While top malls continue to be in high demand, nearly 34 million square feet of U.S. mall space is vacant and off the market. Most Americans live within an hour of a mall with a high vacancy rate or low consumer traffic — or is abandoned altogether.
- G Add in the nationwide housing deficit of 4.5 million homes and it makes a trend that experts say is bound to continue. For developers, adding apartments can not only fill a need, but also bring people closer to their remaining retail stores and restaurants. "Malls are an opportunity," said Knudsen. "This is an opportunity to find land and have a built-in customer base to get people into the mall."
- H While living at the mall is a unique opportunity, it comes with challenges and hurdles. Construction costs are high, and developers need to navigate a maze of zoning laws and antiquated lease agreements to get projects off the ground because malls aren't typically zoned for multifamily developments. Plus, the shape of a typical mall and department store almost always requires a complete teardown to bring in housing. For example, it might seem easy enough to transform an old Macy's store into a few dozen apartments, but given the shape of the building, it's difficult to do in a way that gives every apartment access to natural light and air.

46. The country has far more retail space than other nations.
47. Turning commercial properties into homes faces difficulties due to high costs and complex regulations.
48. Adding homes to shopping centers can meet housing demands and support nearby businesses.
49. Traditional department stores have been declining and no longer attract customers as they once did.
50. Areas once used for parking or stores are now being transformed into homes linked to shopping areas.
51. Even with shifts in trends, people still enjoy shopping in physical locations.
52. Adequate light and air in all units may not be ensured in conversions of department stores to residential spaces.
53. Most citizens don't live far from shopping centers with low customer traffic.
54. Alternative uses for former stores include distribution facilities, sports venues, and training centers.
55. A property developer believes that mixed-use spaces in a shopping mall is a growing trend.
